Achraf Azize

+33 (0)6 98 26 25 57 | achraf.azize@inria.fr | achraf-azize.github.io | linkedin.com/in/achraf-azize | github.com/achraf-azize

EDUCATION

PhD Candidate - Scool (Inria) - University of Lille — Lille, FR
Interests: Differential Privacy; Multi-armed bandits; Privacy auditing; Membership Inference — *Oct. 2021 – Present*

ENS Paris Saclay: Master's Degree MVA — Gif-Sur-Yvette, FR
Master of Research in Mathematics, Computer Vision and Machine Learning — *Sep. 2020 – Aug 2021*

Ecole Polytechnique: French Engineering School — Palaiseau, FR
Major in Applied Mathematics and Computer Science, Minor in Physics — *Aug. 2017 – Aug 2021*

Moulay Youssef: Preparatory Classes in Science — Rabat, MA
Undergraduate course in Sciences leading to the entrance to the French Grandes Écoles — *Sep. 2015 – May 2017*

PUBLICATIONS

1. **Achraf Azize** and Debabrota Basu. Open Problem: What is the complexity of joint differential privacy in linear contextual bandits? COLT 2024.

2. **Achraf Azize** and Debabrota Basu. How much does each datapoint leak your privacy? Quantifying the per-datum membership leakage. TPDP 2024.

3. **Achraf Azize** and Debabrota Basu. Concentrated differential privacy for bandits. IEEE SaTML, 2024.

4. **Achraf Azize**, Marc Jourdan, Aymen Al Marjani, and Debabrota Basu. On the complexity of differentially private best-arm identification with fixed confidence. NeurIPS, 2023.

5. **Achraf Azize** and Debabrota Basu, Rényi differentially private bandits. PPAI@AAAI, 2023.

6. **Achraf Azize** and Debabrota Basu. When privacy meets partial information: A refined analysis of differentially private bandits. NeurIPS, 2022.

WORK EXPERIENCE

Teaching Assistant — Oct 2021 – Present
ENS Paris-Saclay, Ecole Centrale de Lille — *Lille, FR*
- Graphs in Machine Learning, ENS Paris-Saclay (MVA Masters), 2021-2022, 2022-2023 and 2023-2024, with Daniele Calandriello. Course link.
- Python Practicals, Ecole Centrale de Lille (SDIA Masters), 2022-2023, Course link.

Research Intern — April 2021 – September 2021
InstaDeep — *Paris, FR*
- Multi-Object Manipulation using Relational Reinforcement Learning and Graph Attention Networks
- Achieved zero-shot generalization by successfully controlling a simulated robot's arm to stack objects into a previously unseen number of blocks and configurations

Report available here

Machine Learning Research Intern — April 2020 – August 2020
DataLab Groupe Crédit Agricole — *Paris, FR*
- Developed an Interpretability toolbox (Python), fully integrated into the DataLab's AutoML solution (MLBox)
- Developed an end-to-end AutoDL Script, based on Microsoft NNI framework, that automatically finds the optimal neural architecture for a tabular dataset, within some search space, considering the time and computational budget

Code and scripts available here.

AWARDS AND HONORS

French Government Major-Excellence Scholarship (Top seven in Morocco)
Member of the Moroccan Mathematics Olympiad Team (Top 12)
Ranked 2nd in the Concours National Commun (CNC)
